Doctoral course
Corporate Finance
Fall term 2020, Monday, 9.00 a.m. - 12.00 p.m.
University of Zurich
Syllabus version September 8, 2020

Faculty

Kjell G. Nyborg
Department of Banking and Finance
Plattenstrasse 14
kjell.nyborg@bf.uzh.ch
http://www.nyborg.ch
Phone: $+41 - 44 - 634 - 2980$

Alexander F. Wagner
Department of Banking and Finance
Plattenstrasse 14
alexander.wagner@bf.uzh.ch
http://www.alex-wagner.com
Phone: $+41 - 44 - 634 - 3963$

Teaching Assistants

Lilia Mukhlynina
Department of Banking and Finance
Plattenstrasse 14
lilia.mukhlynina@bf.uzh.ch
Phone: +41-44-634-2969

Stefano Ramelli
Department of Banking and Finance
Plattenstrasse 14
stefano.ramelli@bf.uzh.ch
Phone: $+41 - 44 - 634 - 2953$

Purpose

This course offers a graduate level introduction into corporate finance. The primary goal of the class is that students acquire an awareness and understanding of important issues in corporate finance. The course focuses on presenting "classic" contributions, but will point you to current papers where possible. There will also be time to discuss potential avenues for future interesting research questions. In doing so, some compromises have to be made in terms of how detailed the treatment of each topic can be. The course also presents useful tools from contract theory and game theory. Overall, the course also aims at training students to use these tools for their own research.

Although the course's focus is theoretical, we will attempt to relate models to real world phenomena. There is a separate course on empirical corporate finance, but we will also discuss several empirical papers.

Target group and prerequisites

This course is primarily designed for doctoral students in finance, although it is also open to doctoral students from other social sciences and to interested students in the MScQF program at the University of Zurich. If this is not a mandatory course for you (i.e., if you are not in the Department of Banking and Finance's track B doctoral program) please send an email to Kjell Nyborg and Alex Wagner, indicating your affiliation and attaching your CV.

Since modern corporate finance and organizational economics theory relies heavily on game

and contract theory, participants are expected to be familiar with basic concepts in these areas of microeconomics. The course will emphasize economics rather than mathematical difficulties.

Logistics

This course takes place online on Zoom.
Make sure your webcam, microphone, and speakers are working.

Login Details can be found in OLAT.

Meeting time: Monday, 9 a.m. - 12.00 p.m.

Materials are made available online on OLAT.

Lecture	Faculty	Date	Topic
1	KN	Sept 14	Introduction, logistics, overview of the course topics; Miller&Modigliani: Capital structure and dividend irrelevance
2	KN	Sept 21	Corporate cash holdings and repurchases
3	AW	Sept 28	Payout policy; Incentive contracts
4	AW	Oct 5	Agency and executive compensation
5	AW	Oct 12	Boards; Relational contracts
6	AW	Oct 19	Incomplete contracts
7	-	Oct 26	-
8	KN	Nov 2	Auctions
9	AW	Nov 9	Behavioral corporate finance
10	KN/AW	Nov 16	Student presentations
11	KN/AW	Nov 23	Student presentations
12	KN	Nov 30	TBC
13	AW	Dec 7	TBC
14	-	Dec 14	-
		Jan 11, 2020	Online exam

Requirements

To pass this class, you are expected to fulfill the following requirements:

1. Class participation

2. Problem sets

3. Presentations/Discussions

4. Referee report

5. Exam

The weighting will be: Problem sets 20%, Presentation/discussion 15%, Referee report 15%, Exam 50%. Class participation can lead to discretionary grade adjustments.

Please abide by the following rules. You have to submit all problem sets:

1) typed up in either LaTex, MS Word, or another word processor and turned into a pdf (make sure all formulas and graphs are readable)

2) by email to the teaching assistant responsible. For the file name, use the format PSx_Lastname1Lastname2.pdf, where x stands for the problem set number. Thus, if Merton Miller and Franco Modigliani are submitting problem set 2 of Alex Wagner's part together, the correct file name is PS2_MillerModigliani.pdf, and they would send this to stefano.ramelli@bf.uzh.ch.

You are encouraged to submit the problem sets in groups of two or three students. There are no make-up problem sets or assignments. Late problem sets are not accepted.

Problem sets KN	Distributed	Due date
1	Sept 14	Sept 21, 9.00 a.m.
2	Sept 21	Sept 28, 9.00 a.m.
R	Sept 28	Nov 16, Nov 30
Problem sets AW	Distributed	Due date
1	Sept 28	Oct 5, 9.00 a.m.
2	Sept 28	Oct 12, 9.00 a.m.
3	Oct 12	Oct 19, 9.00 a.m.
R	Sept 28	Nov 16, Nov 30

Problem set R is a discussion of a paper and a referee report. Specifically, on November 16 and 23 students will present and discuss a recent working paper (out of a list provided by KN and AW). Detailed instructions of what such a presentation and discussion should entail will follow. By November 30, you will have to deliver a written referee report on that paper (which should reflect also those issues that came up in your presentation).

Reading list

A comprehensive textbook on corporate finance is Jean Tirole's "The Theory of Corporate Finance". You might find it useful as a reference. For a good introduction to contract theory, we recommend Bernard Salanié's "The Economics of Contracts". The best comprehensive reference is "Contract Theory" by Patrick Bolton and Mathias Dewatripont. An excellent game theory book is Drew Fudenberg's and Jean Tirole's "Game Theory".

A list of papers will be distributed.

On modeling, paper-writing, and life as an academic

The following three references are particularly useful:

Thomson, William. A Guide for the Young Economist. Cambridge, MA: MIT Press, 2011.

Pedersen, Hal R. "How to Succeed in Academia." undated.

Varian, Hal R. "How to Build an Economic Model in Your Spare Time." 2009.
